<b>Orders for Discipline and Treatments</b>	SN: Wound # 2 - Traumatic - posterior_left_elbow - Cleanse with NS. Pat dry. Apply DPD. Change weekly and PRN soilage. SN to assess at each visit.
<b>Goals/Outcome Potential/Discharge Plans</b>	
<b>Clinical Summary</b>	Mr. Fuller was seen this afternoon for a PRN SN visit. His wife Marti was also present. Pt's daughter called the agency to report that pt had woken up this morning with blood on his sheets. Pt's wife noted that he had a new cut to his left elbow, pt unsure how he was injured. Left elbow assessed and he is noted to have a new abrasion measuring 0.5cmx0.5cm scant serosanguinous drainage noted. Pt denies pain, no s/s infection. Area cleansed with NS, DPD applied. PCP Dr. Wills' office called and notified of new wound. Vital signs stable. Pt declined further physical assessment at this visit, wanted to take a nap. Updated pt's daughter Sandy. Reinforced 24/7 agency availability and encouraged family to call with any questions, concerns or changes in status. No other concerns at this time.

<b>Goals/Outcome Potential/Discharge Plans</b>	
<b>Clinical Summary</b>	<p>Mr. Fuller was seen this afternoon for a routine hospice SN visit. His wife Marti and his caregiver Janice were also present. Upon arrival he is walking down the hallway bringing an empty plate to the kitchen. He has visible weight loss, his clothing appears baggier and ill-fitting at this visit. His gait is unsteady and he is noted to be holding the walls and furniture as he is walking. Reinforced use of cane or RW with patient. He refuses to use any assistive devices at this time. Vital signs stable, denies pain at this visit and his wife and caregiver offer no concerns regarding pain.</p> <p>Neuro: Pt is alert, forgetful. Oriented to self and home, disoriented to time and situation.</p> <p>Respiratory: Lung sounds clear and diminished. He is noted to be dyspneic with minimal exertion including standing and walking approx 15 feet in the home, alleviated by rest. No s/s respiratory distress. No cough or congestion noted or reported.</p> <p>Cardiac: Heart sounds S1S2, regular rate and rhythm. Denies chest pain/pressure, palpitations, dizziness. He is noted to have +1 pitting BLE edema (left leg &gt; right leg).</p> <p>GI/GU: incontinent of bowel and bladder at times. Denies s/s UTI. He has +BSx4, abdomen soft, non-distended, non-tender to palpation. No s/s GI discomfort and no report of NVDC. Last BM this morning.</p> <p>Skin: Pale, warm and dry. Scattered bruising to his extremities. His legs are dry and slightly flakey. His wife and caregiver apply lotion daily. No wounds or open areas.</p> <p>Diet/Appetite: Regular consistency with thin liquids. For breakfast today he had approx 1 cup corn flakes with 1/2 cup milk. For lunch he ate a ham and cheese sandwich on hamburger bun with a can of root beer. Per caregiver and wife these are typical foods/amounts for him at</p>

these meals. Per his caregiver Janice he has been refusing dinner more frequently, refused most nights last week. No coughing/choking reported while eating or drinking.

Reinforced 24/7 agency availability and encouraged pt's wife and caregiver to call with any questions, concerns or change in status. No concerns at this time.
