PT Evaluation: 06/05/2025 (1293013804)

Tavares, Shirley L (MA250328114901)

Date of Birth: 11/10/1949 ✓ Patient identity confirmed

Time Out: 17:22 Visit Date: 06/05/2025 Time In: 16:52

Diagnosis / History

Medical Diagnosis: Gastric ulcer Exacerbation

BLE weakness PT Diagnosis: Exacerbation 04/24/2025

Relevant Medical History:

CKD stage 5, former smoker, HTN, HLD, DM, P Afib, chronic HFPEF, asthma, COPD, alcoholic liver cirrhosis, chronic pain syndrome, chronic anemia, OSA, hypothyroidism, GERD, depression with anxiety, hx colon ca, knee OA, cataract, Crohn's disease, emphysema, GERD, hypercholesterolemia, kidney stone, low back syndrome, lumbar (Continued)

Prior Level of Functioning:

Patient was independent with all functional mobility without the use of an AD prior to injury, patient was independent with ADLs and was driving

Patient's Goals:

'To get back to normal"

Precautions:

Homebound?

☐ No ✓ Yes

For a patient to be eligible to receive covered home health services under both Part A and Part B, the law requires that a physician certify in all cases that the patient is confined to his/her home. For purposes of the statute, an individual shall be considered "confined to the home" (homebound) if the following two criteria are met:

Criteria One:

✓ Patient is confined because of illness, needs the aid of supportive devices such as crutches, canes, wheelchairs, and walkers; the use of special transportation; or the assistance of another person in order to leave their place of residence.

☐ Patient has a condition such that leaving his or her home is medically contraindicated.

Patient currently utilizes a RW and currently cannot enter/exit home safely on stairs without assist from

If the patient meets one of the criterion one conditions, then the patient must ALSO meet two additional requirements defined in criterion two below.

Criteria Two:

Patient has a normal inability to leave home.

Leaving home requires a considerable and taxing effort for the patient.

Specify:
Patient has COPD and is notedly short of breath with minimal exertion at this time

PT Evaluation : 06/05/2025 Tavares, Shirley L (MA250328114901)
Treatment Goals and Plan Audits
Goal Summary
Unmet Goals (5)
(FT) Patient will improve ambulation from SBA 150ft with RW to mod I for at least 200ft with RW/rollator by end of episode in order for patient to safely access entire home Goal Term: long Target Date: 07/26/25
(FT) Patient will improve transfers from SBA to mod I with RW/rollator in order to increased functional independence and safety in home by end of episode Goal Term: long Target Date: 07/26/25
(FT) Patient to improve standing static and dynamic balance from poor to at least fair- by end of episode in order to decrease risk of falls Goal Term: long Target Date: 07/26/25
(FT) Patient will be independent with HEP by end of episode to increase functional strength and decrease risk of falls Goal Term: long Target Date: 07/26/25
(FT) Patient will improve gross BLE strength to at least 4/5 for all major muscle groups in order to increase stability during mobility Goal Term: long Target Date : 07/26/25

PT Evaluation Addendum Page : 06/05/2025 Tavares, Shirley L (MA250328114901)

Relevant	Medical	History
----------	---------	---------

radiculopathy affecting BLE, DDD lumbar, DDD cervical, chronic hypoxic hypercapnia RF, lumbar spinal stenosis with neurogenic claudication, anemia, peripheral autonomic neuropathy due to DM, obesity BMI 30, B knee OA, BLE multiple bruises, vomiting, ESRD, hyponatremia, hypocalcemia, prolonged QTC, uremia, UTI, hypothyroidism.

Clinical Statement of Assessment Findings and Recommendations

the 4WW does not fit through the doors. Patient condones ongoing BLE progresive weakness and states she has had several falls this year. Reviewed standard precautions, fall precautions, HEP, and pain management with patient and caregiver. Patient scored a 17/28 on tinetti and 19sec on TUG both indicating increased risk of falls, and scored unable on 5XSTS indicating decreased BLE strength. Patient would benefit from continued skilled PT services 2x week/8 weeks in order to address limitations in strength, balance and endurance in order to decrease risk of falls, re-hospitalization and to return patient to PLOF.
